The World's Most Portable Intelligent Cart-Based Ultrasound

SonoPort revolutionizes cart-based ultrasound system through physics-defying portability and specialized intelligence. Beyond reimagining mobility, this AI-empowered diagnostic platform engineered to liberate precision ultrasound from the static lab and deliver it intelligently, instantly, anywhere patient care demands.

Portable Design:
Easy to Move, Transport and Adjust.

User-Centric Core

Ergonomically designed to suit healthcare professionals of all shapes and sizes.

An icon depicting two healthcare professionals, one standing and one sitting, both positioned to interact with the ultrasound machine, illustrating its ergonomic design for different body types.

Seamless Movement, Room to Room.

An icon showing the ultrasound machine being moved from one building to another, representing its portability and ease of transport between different rooms or locations.

Adaptive for Different Clinical Environments.

An icon featuring a central human silhouette surrounded by a circular arrangement of medical icons, including a heart, lung, bone, fetus, and other anatomical symbols, signifying its adaptability to various clinical settings.

Lower Transportation Costs.

An icon showing the ultrasound machine next to a van, with a vertical line and '1M' indicating its compact size, which facilitates easy loading and unloading, leading to lower transportation costs.

Seamless Imaging · Intelligent Control
