WHAT IS CRYOTHERAPY?

Cryotherapy is the science of exposing the body to sub-zero temperatures in order to stimulate physical and mental health benefits.

It reduces inflammation in the body by boosting an anti-inflammatory chemical called norepinephrine.

Cryotherapy also boosts blood circulation throughout the body which results in a higher metabolic and caloric burn rate. The treatment also increases the level of endorphins which can elevate mood

In terms of beauty benefits, cryotherapy increases collagen production, which in turn tightens the skin, and brings forth a youthful glow.

BENEFITS

1

MUSCLE RECOVERY

2

PAIN MANAGEMENT

3

HEALTH & WELLNESS

4

BEAUTY & ANTI-AGING

5

BOOST IMMUNE SYSTEM

6

WEIGHT LOSS

WHAT IS WHOLE BODY CRYOTHERAPY?

Whole body cryotherapy (WBC) is a three minute treatment that exposes the entire body to extreme temperatures as low as -140°C in order to promote recovery, performance, wellness, beauty, and weight loss benefits.

BOOST IMMUNE SYSTEM

During cryotherapy your body's production of anti-inflammatory hormones significantly increases, reducing inflammation in the body. This happens because of the increase of your body's immune cells. This boost to your immune system helps you destroy viruses and fight off tumor factors.

BEAUTY & ANTI AGING

CRYO Total can help maintain a youthful appearance by reducing the signs of aging such as wrinkles and fine lines, while also tightening the skin and reducing cellulite. Cryotherapy stimulates collagen production in the deeper layers of skin resulting in a smoother, firmer and more youthful look.

MUSCLE RECOVERY

CRYO Total users can train harder, longer, and recover quicker, which helps them achieve maximum results from workouts. During a treatment, as temperatures rapidly cool, oxygen is pushed through the body to help reduce inflammation, relieve pain and recover the muscles.

HEALTH & WELLNESS

Medical studies have shown that WBC helps individuals battle insomnia and induces deeper sleep. The treatment also reduces stress and anxiety, and improves the immune system and organ function.

WEIGHT LOSS

CRYO Total promotes natural loss of weight. The treatment helps stimulate blood flow throughout the body and boost the delivery of oxygenated blood, which leads to the increase of metabolic rate.

PAIN MANAGEMENT

CRYO Total reduces pain and speeds up the injury recovery process. During a treatment, the body slows down nerve signal transmissions and releases a neurotransmitter that reduces pain sensitivity. The treatment also speeds up the recovery process by boosting the flow of nutrient-rich blood.

ABOUT CRYO TOTAL

The CRYO Total is designed to deliver the easiest, safest, and most effective whole body cryotherapy treatments in the industry. Built using state of the art technology, and created to ensure that the client is never in direct contact with nitrogen vapors, the CRYO Total matches its futuristic design with the highest safety standards.

The CRYO Total delivers a premium customer experience on the market with a client facing screen showing relevant information, with 21-inch digital touch display for a intuitive user experience to manage treatments, high standard interior finish with modern safety sensors.

The user-friendly, intuitive and streamlined interface is displayed on a large 21-inch touch screen to simplify the comfort of use and management the capsule settings.
